

Norbar NB 18113.B08

Popis produktu:

Pneumatic Multiplier, 1350 N·m, Bi-Directional, Shut-Off Internal Control, 1" square drive; PneuTorque PTM-72-1350-B-IC

PTM-72 tools use the same 'twin motor' handle as the PTM-52 but fitted with a durable 72mm gearbox to allow higher torque outputs. The 'twin motor' concept gives the benefit of high run-down speeds while adding very little to the size and weight of the tool.

The integration of electronic torque measurement and control into the PTM-72 Series is achieved with the minimum impact of overall size and weight. The actual applied torque is accurately measured at the output of the tool meaning that a repeatability of $\pm 2\%$ can be guaranteed.

Shut-Off, Internal Control tools include a torque transducer, easy to read LED display, control panel and a solenoid valve to shut off the air supply once the desired torque has been reached.

Technická data:

Označení: NB 18113.B08
Obj. číslo: 1039
