Norbar NB 43500

Popis produktu:

NorTronic 3/8" Square Drive, 50 N-m, 868MHz

The NorTronic®, Norbar's electronic torque wrench, sets the benchmark with its unique Torque Data System (TDS) software and combination of accuracy, wireless capability and angle measurement, in a versatile, robust and easy to use package.

In order to communicate wirelessly between a NorTronic and a PC it is necessary to purchase the appropriate USB Wireless Adaptor. This is sold separately because each adaptor can handle up to eight NorTronic wrenches.

There are two communication frequency versions of the NorTronic because different countries operate different licence free radio transmission bands. The two frequencies that we offer cover most areas of the world. Please [click here](#) to view the map we have provided as a guide to the appropriate frequency to buy however, it is the user's responsibility to ensure that local laws are complied with.

Technická data:

Označení: NB 43500

Obj. číslo: 1331
